

José Daniel Maitán Jiménez

.NET Software Developer | Backend & Full-Stack Development

Buenos Aires, Argentina | +54 11 3090-6572 | jdmaitan@gmail.com

linkedin.com/in/jdmaitan | github.com/jdmaitan

Software Developer with professional experience building and maintaining commercial applications and backend services using C# and .NET. Experienced across desktop application development, ASP.NET Core REST APIs, WCF/SOAP services, relational databases, production debugging, refactoring, and software testing. Worked throughout the software development lifecycle, from implementation and integration to troubleshooting and maintenance of systems used in commercial operations. Holds a Master's Degree in Web Applications and Services Development, with hands-on experience in backend architecture, business rules, background processing, API documentation, Docker, and automated testing. Combines practical software development experience with a strong engineering background and a focus on delivering reliable software solutions.

Technical Skills

- **Backend & .NET:** C#, .NET, .NET Framework, ASP.NET Core, REST APIs, WCF/SOAP, Entity Framework Core, ADO.NET, SQL, Quartz.NET
- **Desktop & Application Development:** Windows Forms, desktop application development, application maintenance, debugging, refactoring, production support
- **Databases:** MySQL, SQLite, SQL Server
- **Testing & Quality:** Unit testing, integration testing, xUnit, MSTest, Moq, test-driven development, automated testing
- **Architecture & Software Practices:** SOLID, design patterns, Clean Architecture, modular application design, Agile/Scrum, Kanban, UML
- **Frontend & Web:** HTML, CSS, JavaScript, TypeScript, Angular, Ionic, React, Bootstrap
- **Tools & Infrastructure:** Git, GitHub, GitLab, Docker, OpenAPI/Swagger
- **AI Assisted Development:** GitHub Copilot
- **Additional Knowledge:** Redis, MongoDB, Blazor, WPF, Azure, Azure DevOps, CI/CD, Kubernetes, microservices, Domain Driven Design, Behavior Driven Development
- **Languages:** Spanish – Native | English - C2

Professional Experience

Universidad de Alicante | Alicante, Spain

R&D Developer | 04/2025 – 07/2025

- Led backend-focused development of a web and mobile remote medical monitoring application throughout the software development lifecycle.
- Designed and implemented backend functionality using C#, ASP.NET Core, REST APIs, and Clean Architecture.
- Developed a configurable business-rules engine with NRules, separating domain logic from the core application.
- Implemented scheduled background processing with Quartz.NET and notification workflows using Firebase and Brevo.
- Used Docker for containerization and OpenAPI/Swagger for API documentation and frontend integration.
- Wrote .NET automated tests using xUnit, MSTest, and Moq.
- Contributed to the Angular/Ionic frontend by resolving integration and presentation issues.

The Factory HKA | Caracas, Venezuela

Software Developer | 12/2019 – 09/2022

- Developed and maintained commercial and internal software applications using C# and .NET Framework, supporting fiscal operations across multiple countries.
- Designed and implemented a production desktop application using Windows Forms, primarily supporting the Panamanian fiscal market.

- Developed and maintained desktop tools used across the company's development departments to test and validate fiscal printers.
- Refactored, debugged, and extended existing commercial and internal applications, resolving production issues and implementing new functionality.
- Maintained and improved WCF/SOAP services built with .NET Framework, supporting internal workflows and commercial operations.
- Developed ASP.NET Core REST services for internal tools.
- Worked with existing MySQL and SQLite databases, writing SQL queries and stored procedures. Used ADO.NET primarily and later worked with Entity Framework Core.
- Investigated software, hardware, and serial-communication issues involving fiscal devices, improving reliability across different systems.
- Participated in the complete development and maintenance lifecycle, including implementation, debugging, testing, documentation, deployment support, and production troubleshooting.

Firmware Developer | 09/2018 – 12/2019

- Developed and debugged firmware in C for PIC and ARM-based microcontrollers used in fiscal printer modules.
- Implemented small functionality enhancements, investigated hardware/software issues, and performed testing and technical documentation.
- Collaborated with firmware, laboratory, and quality teams to validate fiscal hardware behavior and regulatory requirements.

Fundación Instituto de Ingeniería | Caracas, Venezuela

Engineering Intern | 07/2017 – 06/2018

- Contributed to the adaptation of a 60 kW AC/DC static converter control system, implementing digital control logic using FPGA-based systems, three-phase controlled rectification, and PID control.

Education

Master's Degree in Web Applications and Services Development

Universidad de Alicante | Alicante, Spain | 2025

Premio Extraordinario Curso Académico — awarded for the highest academic performance in the cohort.

Bachelor's Degree in Electrical Engineering

Universidad Central de Venezuela | Caracas, Venezuela | 2018

Specialization in Electronics, Computing, and Control

Certifications

- **AI Assisted Development: Programming with Agents** - BIG School, 06/2026
- **Redis for .NET Developers** - Redis, 11/2025
- **Getting Started with Redis** - Redis, 11/2025
- **MongoDB C# Developer Path** - MongoDB, 11/2025
- **Front-End Web UI Frameworks and Tools: Bootstrap 4** - Coursera, 07/2022
- **Software Development Lifecycle Specialization** - Coursera, 07/2022
- **Software Design and Architecture Specialization** - Coursera, 06/2022
